Experience

Unitron AI

March 2024 - Jan 2025

Senior Full-stack Engineer (IC)

Hyderabad, Telangana

- Developed an **Automation** app with **AI integration**, reducing task completion time by streamlining user workflows
- Engineered a freelancer-client platform as an individual contributor, enabling **efficient task execution** and **collaboration**
- **Released Beta**, acquiring **500 users** in a pre-market launch, and **drove iterative improvements** based on early feedback

AutoGolf

Aug 2023 - Feb 2024

Back-end Engineer

Florida, USA (Remote)

- Implemented robust back-end technologies to ensure seamless functionality and high-performance of the application
- Managed full development cycle, utilized Git and BitBucket, and adapted to new tech, earning positive client feedback
- Employed DevOps methodologies to streamline CI and CD, resulting in a highly efficient development pipeline

Level SuperMind

June 2021 - July 2023

Lead Product Engineer

Mumbai, Maharashtra

- **Led a team of 4 people** to drive revenue, achieving organizational **break-even point**
- Acquired **10K+ users** by building a web-app for boot-camp that helped conduct sessions on Meditation and Workout
- Tested and Identified **critical bugs** in customer-facing products, and helped resolve them along with Android team
- Built internal tools for data analysis and decision-making

Software Engineer

- Reduced bandwidth by **up to 78%** through implementation of HTTP Live Streaming, improving user experience
- Reduced API **response time by 63%** by implementing caching mechanisms, resulting in better conversions
- Seamlessly handled **thousands of transactions** on a monthly basis by building the Payment Infrastructure end-to-end
- Designed robust database schema that helped shape the foundation of the back-end infrastructure for the start-up

Algorisys Technologies

Jan 2021 - Aug 2021

Software Engineer

Mumbai, Maharashtra

- Led a team in developing cross-platform mobile apps using React Native and Node.js
- Built a full-stack web app with Java Spring, leveraging Docker, AWS and PostgreSQL for improved efficiency and scalability.
- Demonstrated expertise in developing both mobile and web applications with a focus on enhancing user experience

MailModo

Feb 2020 - Apr 2020

Front-end Intern

Bangalore, Karnataka

- Built high-performance AMP email templates used by established companies
- Developed internal tools such as a DNS validator

Education

Gauhati University

2020

Bachelor of Computer Applications

Guwahati, Assam

Relevant Courses: C Lang, Computer Hardware, Mathematic, Software Engineering, Data Structure and Algorithms, DBMS, Computer Organization and Architecture, OOP in C++, Java, OS, Linux, Computer Networks

Projects

🔗 Face Rekognition

Recognize faces based on pre-trained data

AWS (Lambda Function, Rekognition, DynamoDB, S3), TerraForm

- Triggered AWS Lambda Invoke based on AWS S3 notifications to automate the training process
- Implemented storage of training data in an AWS Rekognition index in Vector form, mapped to individuals via DynamoDB

Skills

- RESTful, Node, Fastify, Express, Node, JavaScript, SASS, MySQL, Redis, PostgreSQL, MongoDB, DynamoDB,
- React, Next, Gatsby, TailwindCSS, TypeScript, GraphQL, PrismaORM, Rust, Docker, Git, AWS, TerraForm
